PROBLEM STATEMENT #33

Retail, E-Commerce & Finance

Micro-Lending & Peer Credit Risk Assessor

A peer-to-peer micro-finance platform calculating borrower risk scores using heuristic rules, generating structured repayment schedules, and triggering automated default warnings.

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale (short)	Comments
FR-001	Functional	The system shall generate a structured repayment schedule for loan with specified amounts, due data and balance.	High	Appropriate repayment schedule is generated for a given loan.	The core functional requirement of generating repayment schedules	
FR-002	Functional	The system shall issue warnings whenever a repayment due is coming up and whenever it is not paid on time as default.	High	Borrower is notified before loan is overdue.	Minimizes payments missed due to borrower forgetting. Core requirement	
FR-003	Functional	The system shall allow the user to view all pending loans and repayment schedules from their profile	Medium	All user loans are shown without error and repayment schedules are listed.	This functionality allows all users to get an overview of their current loans and repayment statuses.	
FR-004	Functional	The system shall compute borrower credit risk ratings based	High	Risk tier (Low/Med/High) accurately	The core peer risk assessment	

		on debt-to-income ratio, repayment history, and employment stability indicators.		assigned;	functionality.	
FR-005	Functional	The system shall allow users to submit loan requests with amount, purpose, employment and preferred method of repayment.	High	Loan request is successfully stored in the database.	This is a core functionality as the lenders need to see all the borrowers' requests.	
NFR-001	Nonfunc.	Performance: The risk assessment will be performed and a result will be shown within 3 seconds.	High	All of the risk assessment is performed within a maximum of 3 seconds and is accurate.	Allows fast feedback to the user and increases responsiveness.	
NFR-001	Nonfunc.	Security: The system will secure all borrower and lender details only allowing required people to view them.	High	Unauthorized users cannot access restricted data.	Secures sensitive financial information
